

WEBB BUILDING GROUP

Webb Building Group has been building dreams, one project at a time, since 2007.

Owned and operated by Jim and Brian Webb, the company is built on a firm foundation of sixty-plus years of construction experience between the two brothers as well as a legacy of integrity and trust.

During their distinguished careers, both brothers rose to executive-level positions with their respective companies before stepping out on their own. Brian worked for an award-winning national firm as a vice president of construction and operations while Jim was a vice president of new homes at a family-owned and highly respected regional builder.

Currently, Webb Building Group offers a number of services in addition to building custom and semi-custom homes. Besides their talents as builders, Webb Building Group's combined experience includes consulting, commercial construction, entitlements, and remodeling.

The company's commercial TEAM has built its reputation on delivering quality and developing strong relationships with their associates — architects, engineers, municipalities, and other trade partners. Webb Building Group's full-service design/build division helps navigate commercial customers through leased space fit-outs, renovations, or new construction while their efficient scheduling systems and national suppliers and trade partners allow them to drive extreme efficiencies and time savings into their schedules and completion dates.

Whether a customer is looking to distinguish, enhance, or beautify an existing property, Webb Building Group's TEAM is poised to design, build, and service projects through their custom renovation division.

One of Webb Building Group's favorite renovation projects was the historic 1760 Spencer House, which is believed to be the second oldest farmhouse in Bucks County. This beautiful stone and stucco period home is located within the established community of Holly Farm Estates in the Borough of Ivyland. The home was meticulously renewed to twenty-first century standards while still maintaining the house's original elegant millwork, authentic custom built-ins, and wide plank flooring.

As part of their custom renovation division, Webb Building Group designs and transforms unfinished basement space into lower level living, and specifications are custom designed to meet the lifestyle of their clients.

A core segment of Webb Building Group is its new construction services. The company builds single family and attached multi-family homes/communities throughout Bucks County.

Webb Building Group is a leader in innovation, building techniques, quality, environmental stewardship, and communication with all parties within each project. Communication is key and a main reason why most of the company's business comes through referrals and repeat business.

Serving as liaison between the client and the company's trade partners, Webb Building Group is intimately involved from day one in every project they manage. Their hands-on approach, encouraging ongoing dialogue with clients, and daily site visits are outstanding customer service traits that differentiate Webb Building Group from their competition.

The company's TEAM members, consisting of various professional trade groups, are partners with whom Webb Building Group has diligently worked to build loyalty and long-term relationships over the years. These relationships are designed to ensure that customer expectations are exceeded on every single project managed by Webb Building Group.

Another segment which has become a major part of their business is their fire restoration division.

The company assists families during one of the most difficult times in their lives, working to get fire victims back on their feet much more quickly than if they tried to rebuild on their own. By being involved at the onset and dealing with insurance companies, municipal governments, and other government agencies, Webb Building Group mitigates for their clients some of the stress that accompanies such a devastating loss.

The brothers have also invested their time to establish and perpetuate relationships with local municipal governments for compliance with building codes and ordinances to ensure each Webb Building Group project is structurally sound and exceeds industry standards. In fact, municipal governments are an integral TEAM member at Webb Building Group.

As life-long residents of Bucks County, the brothers have given of their time and resources over the years to various local sports teams, and they serve on a variety of boards including banks, municipalities, non-profit organizations, and trade schools.

Throughout Bucks County, the name Webb Building Group is synonymous with integrity, and the brothers are dedicated to improving the quality of life for Bucks County residents through their Warrington-based business and through their philanthropy.
